

JOANNA WILKOSZ

MSC IN NEUROSCIENCE

+45 50 19 01 12 | contact.joannawilkosz@gmail.com | joanna-wi.github.io | 2600 Glostrup

PROFILE

As a neuroscience professional with a background in scientific consulting, neuroimaging, and behavioural economics, I find my purpose in exploring the mechanisms behind consumer choice. This passion has led me to develop proficiency in guiding projects from ideas, through data collection and analysis, to engaging, evidence-based narratives. I strive to contribute to products and services that push beyond the status quo to address unmet needs and raise the standard of user experience.

EXPERIENCE

Product & Services Specialist

Nov. 2025 – Nov. 2026

iMotions, Copenhagen

My current role is focused on delivering biosensor-based consulting projects to global commercial clients with the aim of optimising consumer experience, product performance, and marketing impact.

- Contributed to the design, preparation, and piloting of studies evaluating sensory experiences, digital UX, packaging, advertising materials, and in-store environments.
- Performed on-site, field-based, and remote data collection.
- Conducted statistical analysis of physiological (e.g. eye tracking, facial expression analysis, voice analysis) and behavioural (e.g. surveys, tasks, verbal feedback, mouse clicks) data.
- Built report decks driving consistent positive client feedback and follow-on projects.
- Completed a five-month SaaS sales training program, gaining proficiency in conducting software product demonstrations for academic and commercial clients.
- Provided support to customers and prospects through Intercom.

Clinical Assistant (temporary)

Feb. 2024 – Feb. 2025

Center for Neuropsychiatric Schizophrenia Research, Copenhagen

In this position, I contributed to clinical trials investigating novel approaches to schizophrenia treatment, including a pharmaceutical drug candidate and VR therapy.

- Supported study design, piloting and protocol optimisation.
- Carried out collection of physiological data (EEG, EMG).
- Maintained documentation of participant information and recording parameters.
- Trained new team members in data collection procedures.
- Participated in communication with industry partners.

Thesis Student

Sep. 2022 – Jul. 2023

Neurobiology Research Unit, Copenhagen

My Master's thesis project explored reward- and risk-processing in entrepreneurs and managers through a combination of neuroimaging (fMRI) and behavioural methods.

- Carried out statistical analysis of demographic, behavioural and neuroimaging data.
- Conducted a review of 150+ academic articles on behavioural economics, entrepreneurship, as well as the neural basis of value perception, risk assessment and economic choice.
- Delivered presentations on neuroscience topics to audiences of up to 40 people.
- Engaged in interdepartmental collaboration for research and event planning.
- Authored a thesis on *Neural processing of risk taking in entrepreneurs*.

EDUCATION

MSc in Neuroscience

Sep. 2021 – Jun. 2023

University of Copenhagen, Copenhagen

- Acquired specialised knowledge of brain structure and its functions, complemented by training in experimental techniques and statistical tools relevant to neuroscience.
- Completed elective courses on Computational Neuroscience as well as Drug Discovery and Development.
- Achieved GPA 10.46 and thesis grade 12.

BSc in Neurobiology

Oct. 2017 – Sep. 2020

Jagiellonian University, Krakow

- Completed 50+ courses on subjects within neuroscience, biology and research design.
- Worked as a student researcher at the Maj Institute of Pharmacology, analysing temporal patterns in acoustic data from rodent models of psychiatric disorders.
- Graduated with an Award of Distinction.

KEY SKILLS

Domain knowledge:

- Neuroscience
- Psychology
- Behavioural economics
- Consumer insights
- Biosensor technologies

Project execution:

- Project coordination
- Experimental design
- Data collection and analysis
- Science communication
- Technical sales support

Technical skills:

- Statistics (Jamovi, Python)
- Programming (Python)
- MS Office
- Power BI (portfolio)
- Intercom

LANGUAGES

Polish (native)

English (full professional proficiency)

Danish (limited working proficiency)

INTERESTS

On a personal level, I am adventurous and sociable. I thrive on the dance floor, never say no to a cosy board game night with friends, and proudly consider myself a connoisseur of great books and terrible movies.
